

Datasheet: MCA5966GA

BATCH NUMBER 280814

Description:	MOUSE ANTI HUMAN INTERLEUKIN-32
Specificity:	IL-32
Other names:	IL-32
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	B08-3A9
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			
Western Blotting	▪			1/1000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from ascites
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	<i>E. coli</i> derived recombinant protein corresponding to aa 2-131 of human IL-32α

Synonyms

NK4, TAIF

Fusion Partners

Spleen cells from immunised BALB/c mice were fused with cells of the mouse SP2/0 myeloma cell line

Specificity

Mouse anti Human Interleukin-32, clone B08-3A9, recognizes human IL-32, a 26 kDa cytokine. There are four known isoforms of IL-32, IL-32 α , β δ and γ . IL-32 activates NF-kappa-B and p38 MAPK cytokine signaling pathways. IL-32 has a pro-inflammatory role in innate and adaptive immune responses and is produced by mitogen-activated lymphocytes, IFN gamma-activated epithelial cells and IL-12, IL-18, IL-32-activated NK cells.

IL-32 is expressed at elevated levels after the activation of T-cells by mitogens or the activation of NK cells by IL-2. Among its other effects in innate immunity are the induction of the crucial inflammatory cytokines TNF α and IL-6. and it shows elevated levels of expression in various inflammatory autoimmune diseases, certain cancers, as well as viral infections (Kim, 2014).

Storage

Store at +4°C or at -20°C if preferred.
Storage in frost-free freezers is not recommended.
This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee

12 months from date of despatch

**Health And Safety
Information**
