

Datasheet: MCA5972A488 BATCH NUMBER 162590

Description:	MOUSE ANTI PIG CD335:Alexa Fluor® 488
Specificity:	CD335
Other names:	NKp46
Format:	ALEXA FLUOR® 488
Product Type:	Monoclonal Antibody
Clone:	VIV-KM1
Isotype:	lgG1
Quantity:	100 TESTS/1ml

Product Details

Applications This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u>.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	•			Neat - 1/10
Immunofluorescence			•	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Pig		
Product Form	Purified IgG conjug	ated to Alexa Fluor® 48	8 - liquid
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm
	Alexa Fluor®488	495	519
Preparation	Purified IgG prepar supernatant	ed by affinity chromatog	raphy on Protein A t
Buffer Solution	Phosphate buffered	d saline	
Preservative	0.09% Sodium Azio	de (NaN ₃)	
Stabilisers	1% Bovine Serum	Albumin	

Approx. Protein Concentrations	IgG concentration 0.05 mg/ml		
Immunogen	Fusion protein consisting of the extracellular region of porcine CD335.		
Fusion Partners	Spleen cells from immunized Balb/c mice were fused with cells of the SP2/0 myeloma cell line		
Specificity	Mouse anti Pig CD335 antibody, clone VIV-KM1 recognizes the porcine homologue of human CD335, also known as NKp46 and natural cytotoxicity triggering receptor 1 (NCR1), a member of the natural cytotoxicity receptor (NCR) family.		
	CD335 is a type I transmembrane protein, with two extracellular C2-type immunoglobulin-like domains, which functions as an activating receptor and is involved in the control of viral infection and tumor development. CD335 is expressed by human natural killer cells (<u>Sivori <i>et al.</i>1997</u>). The development of monoclonal antibodies to bovine CD335 (clone <u>AKS1</u>) (<u>Storset <i>et al.</i>2004</u>) and ovine CD335 (clone <u>EC1.1</u>) (<u>Connelley <i>et al.</i>2011</u>) have enabled researchers to identify and better understand ruminant NK cells.		
	Mouse anti Pig CD335 antibody, clone VIV-KM is the first monoclonal developed to specifically identify porcine CD335 and provides a reagent to facilitate a better understanding of the pig immune system and aid in the understanding of the role of NK cells in host pathogen defense. Porcine CD335 is not expressed by all NK cells and expression may be influenced by cytokine production (<u>Mair <i>et al.</i> 2012</u>).		
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 ⁶ cells in 100ul
