### Product Details

**Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

**Target Species**

Horse

**Product Form**

Purified IgG conjugated to Horseradish Peroxidase (HRP) - liquid

**Preparation**

Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant

**Buffer Solution**

Phosphate buffered saline

**Preservative**

0.01% Thiomersal

**Stabilisers**

HRP Stabiliser ([BUF052A](#))

**Approx. Protein Concentrations**

IgG concentration 1.0 mg/ml

**Immunogen**

Equine IgE

**Fusion Partners**

Spleen cells from immunised Balb/c mice were fused with cells of the P3X myeloma cell line

**Specificity**

Mouse anti Horse IgE, clone 3H10, recognizes native equine IgE and does not cross react with equine IgM, IgA or IgG.
IgE is an immunoglobulin primarily produced from plasma cells and, in normal serum, present at very low concentrations.

IgE is important in both type 1 hypersensitivity and immunity to parasite infections, in particular parasitic worms where equine IgE levels are significantly elevated following infection.

Monoclonal antibodies to equine IgE are of particular relevance to research into insect bite sensitivity, one of the most widely studied allergic diseases in equid species (Schaffartzik, A. et al. 2012).

**ELISA**

This product may be used as a detection reagent in a sandwich ELISA together with MCA5983GA as the capture reagent.

**References**

**Further Reading**

**Storage**

Store at +4°C. DO NOT FREEZE. This product should be stored undiluted.

**Shelf Life**

18 months from date of despatch

**Health And Safety Information**

**Regulatory**

For research purposes only
