

Datasheet: MCA5985GA

BATCH NUMBER 155948

Description:	MOUSE ANTI HUMAN IP-10
Specificity:	IP-10
Other names:	CXCL10
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	A02-1E10
Isotype:	IgG2b
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from serum free tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	<i>E. coli</i> derived recombinant protein corresponding to aa 22-98 of human IP-10

Synonyms

INP10, SCYB10

Fusion Partners

Spleen cells from immunized BALB/c mice were fused with cells of the SP2/0 myeloma cell line

Specificity

Mouse anti Human IP-10, clone A02-1E10 recognizes the chemokine IP-10. IP-10, also known as CXCL10, is a small cytokine belonging to the CXC chemokine family. IP-10 cDNA encodes a 98 amino acid protein which is cleaved and secreted from a wide variety of cell types in response to interferon gamma and other inflammatory cytokines ([Ohmori & Hamilton 1995](#)).

IP-10 exerts its biological effects mainly via binding to CXCR3 ([van den Borne et al. 2014](#)). Also, CXCR3-independent pathways have been studied for IP-10/CXCL10 involving binding to heparan sulfate glycosaminoglycans (GAGs). IP-10 not only induces chemoattraction of inflammatory cells, but also migration and proliferation of endothelial cells and VSMCs ([Wang et al. 1996](#)).

Storage

Store at +4°C or at -20°C if preferred.
Storage in frost-free freezers is not recommended.
This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee

12 months from date of despatch
