

## Datasheet: MCA5985GA

**BATCH NUMBER 158739**

<b>Description:</b>	MOUSE ANTI HUMAN IP-10
<b>Specificity:</b>	IP-10
<b>Other names:</b>	CXCL10
<b>Format:</b>	Purified
<b>Product Type:</b>	Monoclonal Antibody
<b>Clone:</b>	A02-1E10
<b>Isotype:</b>	IgG2b
<b>Quantity:</b>	0.1 mg

### Product Details

#### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Human
<b>Product Form</b>	Purified IgG - liquid
<b>Preparation</b>	Purified IgG prepared by affinity chromatography on Protein G from serum free tissue culture supernatant
<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative Stabilisers</b>	0.09% Sodium Azide (NaN <sub>3</sub> )
<b>Approx. Protein Concentrations</b>	IgG concentration 1.0 mg/ml
<b>Immunogen</b>	<i>E. coli</i> derived recombinant protein corresponding to aa 22-98 of human IP-10

**Fusion Partners**

Spleen cells from immunized BALB/c mice were fused with cells of the SP2/0 myeloma cell line

---

**Specificity**

**Mouse anti Human IP-10, clone A02-1E10** recognizes the chemokine IP-10. IP-10, also known as CXCL10, is a small cytokine belonging to the CXC chemokine family. IP-10 cDNA encodes a 98 amino acid protein which is cleaved and secreted from a wide variety of cell types in response to interferon gamma and other inflammatory cytokines ([Ohmori & Hamilton 1995](#)).

IP-10 exerts its biological effects mainly via binding to CXCR3 ([van den Borne \*et al.\* 2014](#)). Also, CXCR3-independent pathways have been studied for IP-10/CXCL10 involving binding to heparan sulfate glycosaminoglycans (GAGs). IP-10 not only induces chemoattraction of inflammatory cells, but also migration and proliferation of endothelial cells and VSMCs ([Wang \*et al.\* 1996](#)).

---

**Storage**

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
