

Datasheet: MCA6011GA

Description:	MOUSE ANTI CHICKEN CD268 / BAFF-R
Specificity:	CD268 / BAFF-R
Other names:	TNFRSF 13C
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	2C4
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunohistology - Frozen	▪			
Immunohistology - Paraffin	▪			
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species

Chicken

Species Cross Reactivity

Reacts with: Turkey, Quail, Duck

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG - liquid

Preparation

Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant

Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Chicken BAFF-R transfected HEK293 cells
Specificity	<p>Mouse anti Chicken CD268 / BAFF-R, clone 2C4, recognizes the chicken homologue of human BAFF-R, known also as CD268 and TNFRSF 13C, a cell surface antigen expressed by avian B-cells.</p> <p>Chicken BAFF-R (B cell activating factor receptor) differs from mammalian BAFF-R in that it is produced in B-cells (Reddy et al. 2008) and is not expressed by chicken T-cells. In addition to chicken, clone 2C4 has been shown to cross react with several other commercially important avian species and as such is a specific marker of B-cells for research in domestic galliforms.</p> <p>Mouse anti Chicken CD268 / BAFF-R, clone 2C4 is unique in that it can be used in formalin fixed paraffin embedded tissues and is therefore of particular use on sections from infection studies.</p>
Flow Cytometry	Use 10µl of the suggested working dilution to label 1x10 ⁶ cells in 100ul

Storage	<p>Store at +4°C or at -20°C if preferred.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: 10040: https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf
Regulatory	For research purposes only
