

Datasheet: MCA6013GA

BATCH NUMBER 0915

Description:	MOUSE ANTI SHEEP INTERLEUKIN-8
Specificity:	IL-8
Other names:	CXCL8
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	2C9
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			1/5,000 - 1/50,000
Immunoprecipitation			▪	
Western Blotting			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Sheep
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)

Carrier Free	Yes
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Recombinant sheep IL-8
External Database Links	<p>UniProt: P36925 Related reagents</p> <p>Entrez Gene: 443418 IL8 Related reagents</p>
Synonyms	CXCL8
Fusion Partners	Spleen cells from immunised Balb/c mice were fused with cells of the NSO myeloma cell line
Specificity	<p>Mouse anti Sheep interleukin-8 antibody, clone 2C9, recognizes ovine interleukin-8 (IL-8), also known as C-X-C motif chemokine 8. IL-8 is a 101 amino acid ~16 kDa chemoattractant for neutrophils, basophils and T-cells. IL-8 is produced by several cell types including neutrophils, monocytes and macrophages in response to inflammatory stimulation. Mouse anti Sheep interleukin-8 antibody, clone 2C9 shows no cross-reactivity with ovine IL-1 beta, IL-6, MCP-1 or TNF alpha.</p> <p>Responses to infectious stimuli may vary among ovine species, the response to <i>Mannheimia haemolytica</i>, a causative agent of pneumonia, peritonitis and gangrenous mastitis in ovids, is exaggerated in bighorn sheep (<i>Ovis canadensis</i>) compared to domestic sheep (<i>Ovis aries</i>) with significantly elevated IL-8 levels in response to infection (Herndon et al. 2010).</p> <p>Mouse anti Sheep interleukin-8 antibody, clone 2C9, has been shown to compete with clone 8M6 (MCA1660) for binding of recombinant ovine IL-8 by ELISA, suggesting that the two clones recognize the same or a closely-related epitope.</p>
Flow Cytometry	Use 10ul of the suggested working dilution to label 1x10 ⁶ cells in 100ul.
ELISA	This antibody may be used in combination with AHP425 in sandwich ELISA assays for ovine IL-8.

polymorphonuclear leukocytes of two closely related species, *Ovis canadensis* and *Ovis aries*, in response to *Mannheimia haemolytica* infection. [Infect Immun. 78: 3578-84.](#)

Storage Store at +4°C or at -20°C if preferred.

This product should be stored undiluted.

Storage in frost free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 12 months from date of despatch
