Specificity	Rat anti Mouse CD314 recognizes CD314 also known NKG2D. CD314 is a member of the CD92/NKG2 family of C-type lectin receptors. Members of the CD94/NKG2 family are primarily expressed on natural killer or cytotoxic T cells where they activate or inhibit the cytotoxic activities of these cells. CD314 is an activating receptor and functions in collaboration with DAP10. CD314 binds HLA/MHC molecules which are often upregulated under inflammatory conditions.
