

Datasheet: MCA6080

BATCH NUMBER 160716

| | |
|----------------------|-----------------------|
| Description: | MOUSE ANTI BOVINE CD3 |
| Specificity: | CD3 |
| Format: | Con S/N |
| Product Type: | Monoclonal Antibody |
| Clone: | MM1A |
| Isotype: | IgG1 |
| Quantity: | 0.1 mg |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|---------------------|-----|----|----------------|--------------------|
| Flow Cytometry | ▪ | | | Neat - 1/10 |
| Immunocytochemistry | ▪ | | | |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species

Bovine

Species Cross Reactivity

Reacts with: Bison, Water Buffalo

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Concentrated tissue culture supernatant - liquid

Preparation

Concentrated tissue culture supernatant clarified by filtration through a 0.2 micrometer filter

Buffer Solution

Serum free tissue culture medium containing proprietary protein free supplement

Preservative

0.09% Sodium Azide (NaN₃)

Stabilisers

Approx. Protein Concentrations

IgG concentration 1.0 mg/ml

Immunogen

Monocyte enriched bovine mononuclear cells

Specificity

Mouse anti Bovine CD3, clone MM1A, recognizes bovine CD3. CD3 plays an important role in T cell activation and in expression of intact TCR molecules. Clone MM1A detects bovine CD3 and reacts with bovine alpha beta and gamma delta TCR+ T cells and recognizes an epitope located on the epsilon chain of CD3 ([MacHugh *et al.* 1998](#)). Mouse anti Bovine CD3, clone MM1A also reacts with Zebu ([Conrad *et al.* 2007](#)).

Flow Cytometry

Use 10ul of the suggested working dilution to label 10⁶ cells in 100ul

References

Storage

Store at +4°C. DO NOT FREEZE.

Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee

12 months from date of despatch

Health And Safety Information
