

Datasheet: MCA6080

Description:	MOUSE ANTI BOVINE CD3
Specificity:	CD3
Format:	Con S/N
Product Type:	Monoclonal Antibody
Clone:	MM1A
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			Neat - 1/10
Immunocytochemistry	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species

Bovine

Species Cross Reactivity

Reacts with: Bison, Water Buffalo

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Concentrated tissue culture supernatant - liquid

Preparation

Concentrated tissue culture supernatant clarified by filtration through a 0.2 micrometer filter

Buffer Solution

Serum free tissue culture medium containing proprietary protein free supplement

Preservative Stabilisers

0.09% Sodium Azide (NaN₃)

Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Monocyte enriched bovine mononuclear cells

Specificity	Mouse anti Bovine CD3, clone MM1A , recognizes bovine CD3. CD3 plays an important role in T cell activation and in expression of intact TCR molecules. Clone MM1A detects bovine CD3 and reacts with bovine alpha beta and gamma delta TCR+ T cells and recognizes an epitope located on the epsilon chain of CD3 (MacHugh <i>et al.</i> 1998). Mouse anti Bovine CD3, clone MM1A also reacts with Zebu (Conrad <i>et al.</i> 2007).
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 ⁶ cells in 100ul
References	1. Kato-Mori, Y. <i>et al.</i> (2021) Characterization of a variant CD4 molecule in Japanese Black cattle. Vet Immunol Immunopathol. 232: 110167.
Storage	Store at +4°C. DO NOT FREEZE. Should this product contain a precipitate we recommend microcentrifugation before use.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #20389 available at: 20389: https://www.bio-rad-antibodies.com/uploads/MSDS/20389.pdf
Regulatory	For research purposes only
