

Datasheet: MCA6098F BATCH NUMBER 166661

Description: MOUSE ANTI PIG CI		
Specificity:	CD1	
Format:	FITC	
Product Type:	Monoclonal Antibody	
Clone:	76-7-4	
lsotype:	lgG2a	
Quantity:	0.1 mg	

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .						
		Yes	No	Not Determined	Suggested Dilution		
	Flow Cytometry	-			Neat		
	Where this product has necessarily exclude its a guide only. It is recor system using appropria	s use in such p mmended that	procedur t the use	es. Suggested work r titrates the product	ing dilutions are given as		
Target Species	Pig						
Product Form	Purified IgG conjugated to Fluorescein Isothiocyanate Isomer 1 (FITC) - liquid						
Max Ex/Em	Fluorophore	Excitation Ma	ax (nm)	Emission Max (nm)	-		
	FITC	490		525	_		
Preparation	Purified IgG prepared	by combinatio	n of pre	cipitation and chrom	atography techniques		
Buffer Solution	Phosphate buffered saline						
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)						
Approx. Protein Concentrations	IgG concentration 0.5 mg/ml						
Immunogen	Fresh dd miniature sw	ine thymocyte	S

Synonyms	CD1.1
Specificity	Mouse anti Pig CD1 antibody, clone 76-7-4 recognizes a porcine homologue of the human CD1 cell surface receptor. CD1 is a member of the immunoglobulin superfamily. While it is structurally similar to the MHC class I receptor CD1 differs functionally by presenting lipid antigens to T cells (<u>Germain & Margulies, 1993</u>).
	To date, five classes of the CD1 genes have been identified across different mammalian species, namely CD1A, CD1B, CD1C, CD1D, and CD1E (<u>Brigl & Brenner, 2004</u>). In swine various tissues express CD1C even though its gene has been reported to carry a loss-of-function mutation (<u>Eguchi-Ogawa <i>et al.</i> 2007</u>). CD1 is predominantly found on dendritic cells, macrophages, monocytes, and thymocytes (<u>Chun <i>et al.</i> 1999</u>).
Flow Cytometry	Use 10ul of the suggested working dilution to label 1×10^6 cells in 100ul
References	1. Pauly, T. <i>et al.</i> (1998) Infection with classical swine fever virus: effects on phenotype and immune responsiveness of porcine T lymphocytes. <u>J Gen Virol. 79 (Pt 1): 31-40.</u>
Storage	Store at +4°C. DO NOT FREEZE. This product should be stored undiluted. This product is photosensitive and should be protected from light. Should this product contain a precipitate we recommend microcentrifugation before use.
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA6098F 10040
Regulatory	For research purposes only
