Datasheet: MCA6098PE

BATCH NUMBER 165822

Description:	MOUSE ANTI PIG CD1:RPE
Specificity:	CD1
Format:	RPE
Product Type:	Monoclonal Antibody
Clone:	76-7-4
Isotype:	IgG2a
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			Neat - 1/5

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species

Pig

Product Form

Purified IgG conjugated to R. Phycoerythrin (RPE) - liquid

Max Ex/Em

Fluorophore	Excitation Max (nm)	Emission Max (nm)
RPE 488nm laser	496	578
RPE 561nm laser	546	578

Preparation

Purified IgG prepared by combination of precipitation and chromatography techniques

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers

<0.1% Sodium Azide (NaN_3)
Stabilizing agent (sucrose)

Approx. Protein Concentrations

IgG concentration 0.1 mg/ml

Immunogen	Fresh dd miniature swine thymocytes
External Database Links	**UniProt:** Q9XS72 Related reagents **Entrez Gene:** 396785 CD1.1 Related reagents
Synonyms	CD1.1
Specificity	**Mouse anti Pig CD1 antibody, clone 76-7-4** recognizes a porcine homologue of the human CD1 cell surface receptor. CD1 is a member of the immunoglobulin superfamily. While it is structurally similar to the MHC class I receptor CD1 differs functionally by presenting lipid antigens to T cells (Germain & Margulies, 1993). To date, five classes of the CD1 genes have been identified across different mammalian species, namely CD1A, CD1B, CD1C, CD1D, and CD1E (Brigl & Brenner, 2004). In swine various tissues express CD1C even though its gene has been reported to carry a loss-of-function mutation (Eguchi-Ogawa *et al.* 2007). CD1 is predominantly found on dendritic cells, macrophages, monocytes, and thymocytes (Chun *et al.* 1999).
Flow Cytometry	Use 10ul of the suggested working dilution to label 1x10^6 cells in 100ul
