Datasheet: MCA609A647T BATCH NUMBER 1703

| Description: | RAT ANTI MOUSE CD8 ALPHA:Alexa Fluor® 647 | | | |
|---------------|---|--|--|--|
| Specificity: | CD8 ALPHA | | | |
| Other names: | LY-2 | | | |
| Format: | ALEXA FLUOR® 647 | | | |
| Product Type: | Monoclonal Antibody | | | |
| Clone: | KT15 | | | |
| lsotype: | lgG2a | | | |
| Quantity: | 25 TESTS/0.25ml | | | |

Product Details

| Applications | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> . | | | | | | |
|-----------------------------|--|---|---------------------------|--------------------------|--|--|--|
| | | Yes No | Not Determined | Suggested Dilution | | | |
| | Flow Cytometry | | | Neat - 1/10 | | | |
| | necessarily exclude its | use in such proced nmended that the us | ser titrates the antibody | g dilutions are given as | | | |
| Target Species | Mouse | | | | | | |
| Product Form | Purified IgG conjugated to Alexa Fluor® 647 - liquid | | | | | | |
| Max Ex/Em | Fluorophore | Excitation Max (nm) | Emission Max (nm) | | | | |
| | Alexa Fluor®647 | 650 | 665 | | | | |
| Preparation | Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant | | | | | | |
| Buffer Solution | Phosphate buffered saline | | | | | | |
| Preservative Stabilisers | 0.09% Sodium Azide 1% Bovine Serum Albumin | | | | | | |
| Approx. Protein | IgG concentration 0.05 mg/ml | | | | | | |

Concentrations

| Immunogen | T cell clone, C6 |
|----------------------------|--|
| External Database Links | UniProt: P01731 Related reagents Entrez Gene: 12525 Cd8a Related reagents |
| Synonyms | Lyt2, Lyt-2 |
| RRID | AB_1102365 |
| Fusion Partners | Spleen cells from immunized SD rats were fused with cells of the NS0 mouse myeloma cell line |
| Specificity | Rat anti mouse CD8α, clone KT15, recognizes the <u>alpha chain of mouse CD8</u> . CD8 is a heterodimeric protein composed of disulphide-linked CD8α and <u>CD8β</u> chains that is expressed primarily on cytotoxic T-cells. CD8 functions in the interaction with MHC Class I-bearing targets and plays a role in T-cell-mediated killing (<u>Nakauchi, H. <i>et al.</i>, 1985</u> & <u>Nakauchi, H. <i>et al.</i>, 1987</u>). Clone KT15 is reported to block T-cell-mediated cytotoxicity in <i>in vitro</i> assays (<u>Zeis, M. <i>et</i></u> |
| | |
| Flow Cytometry | Use 10ul of the suggested working dilution to label 10 ⁶ cells in 100ul. |
| | The Fc region of monoclonal antibodies may bind non-specifically to cells expressing low affinity Fc receptors. This may be reduced by using SeroBlock FcR (<u>BUF041A/B</u>). |

| Storage | Store at +4°C or at -20°C if preferred. | | | | |
|----------------------------------|--|--|--|--|--|
| | This product should be stored undiluted. | | | | |
| | Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light. | | | | |
| | Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use. | | | | |
| Guarantee | 12 months from date of despatch | | | | |
| Acknowledgements | This product is provided under an intellectual property licence from Life Technologies Corporation. The transfer of this product is contingent on the buyer using the purchase product solely in research, excluding contract research or any fee for service research, and the buyer must not sell or otherwise transfer this product or its components for (a) diagnostic, therapeutic or prophylactic purposes; (b) testing, analysis or screening services, or information in return for compensation on a per-test basis; (c) manufacturing or quality assurance or quality control, or (d) resale, whether or not resold for use in research.
