

Datasheet: MCA6115APC

### **BATCH NUMBER 164883**

Description:	MOUSE ANTI HUMAN CD11a:APC
Specificity:	CD11a
Other names:	INTEGRIN ALPHA L CHAIN, LFA-1
Format:	APC
Product Type:	Monoclonal Antibody
Clone:	MEM-25
Isotype:	lgG1
Quantity:	100 TESTS/1ml

## **Product Details**

#### **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry				Neat

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human		
Product Form	Purified IgG conjug	gated to Allophycocyanin	(APC) - liquid
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm
	APC	650	661
Preparation	Purified IgG prepa	red by size exclusion chr	omatography from t
Buffer Solution	Phosphate buffere	ed saline	
Preservative	<0.1% Sodium Azide (NaN <sub>3</sub> )		
Stabilisers	0.2% Bovine Seru	m Albumin	
Immunogen	Leucocytes from a	a patient suffering from a I	_GL-type leukemia

bunit, a 170-180 kDa type I transmembrane glycoprotein that associates with CD18 to rm the leucocyte function-associated antigen-1, an alphaLbeta2 integrin expressed at e surface of all human leukocyte.				
FA-1 is a receptor for ICAMs, JAM-1 and F11R. Its interaction with endothelial ligands, such as ICAM-1 and JAM-1 is responsible for leukocyte arrest and extravasation esterman et al.2002). In addition to its role in leukocyte adhesion and transmigration, FA-1 is involved in T cell differentiation (Verma et al. 2016, Verman and Kelleher 2017) and is required for the effective lysis of infected cells by cytotoxic T cells (Anikeeva et al.				
2005, Pontes Ferreira et al. 2017). LFA-1 also contributes to NK cell cytotoxicity (Domingo et al. 2004) and participates to the clearance of apoptotic neutrophils by macrophages (Kristóf et al. 2013). The interaction of LFA-1 with ICAM-1 is the target of Lifitegrast, a drug approved for the treatment of Dry Eye Disease (Abidi et al. 2016).				
ouse anti Human CD11 antibody, clone MEM-25 inhibits the cytotoxic activity of NK cells azil et al. 1990).				
95% by SDS PAGE				
se 10ul of the undiluted product to label 1x10 <sup>6</sup> cells in 100ul				

Purity	>95% by SDS PAGE
Flow Cytometry	Use 10ul of the undiluted product to label 1x10 <sup>6</sup> cells in 100ul
Storage	Store at +4°C. DO NOT FREEZE.  This product should be stored undiluted. This product is photosensitive and should be protected from light.
Guarantee	Guaranteed for 12 months from the date of despatch or until the date of expiry, whichever comes first. Please see label for expiry date.
Health And Safety Information	Material Safety Datasheet documentation #10041 available at: <a href="https://www.bio-rad-antibodies.com/SDS/MCA6115APC">https://www.bio-rad-antibodies.com/SDS/MCA6115APC</a> 10041
Regulatory	For research purposes only
