

Datasheet: MCA6116PE

Description:	MOUSE ANTI HUMAN CD134:RPE
Specificity:	CD134
Other names:	OX40, TNFRSF4
Format:	RPE
Product Type:	Monoclonal Antibody
Clone:	Ber-ACT35
lsotype:	lgG1
Quantity:	100 TESTS/1ml

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .						
		Yes No	Not Determined	Suggested Dilution			
	Flow Cytometry	-		Neat			
	Where this product has not been tested for use in a particular technique this doe necessarily exclude its use in such procedures. Suggested working dilutions are a guide only. It is recommended that the user titrates the product for use in their system using appropriate negative/positive controls.						
Target Species	Human						
Species Cross Reactivity	Reacts with: Primate N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.						
Product Form	Purified IgG conjugated to R. Phycoerythrin (RPE) - liquid						
Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)				
	RPE 488nm laser	496	578				
	RPE 561nm laser	546	578				
Preparation	Purified IgG prepare supernatant	ed by affinity chromatog	raphy on Protein A fror	n tissue culture			

Buffer Solution	Phosphate buffered saline				
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃) 0.2% Bovine Serum Albumin				
Immunogen	HTLV 1-transformed HUT-102 cells				
External Database Links	UniProt: <u>P43489</u> <u>Related reagents</u> Entrez Gene:				
	7293 TNFRSF4 Related reagents				
Synonyms	TXGP1L				
Specificity	Mouse anti Human CD134, clone Ber-ACT35 recognizes CD134 also known as OX40 and TNFRSF4, a 50 kDa glycoprotein. CD134 is a type I transmembrane protein and a member of the tumor necrosis factor superfamily. CD134 is primarily expressed by activated T cells, although the level of expression differs according to T-cell subpopulations (<u>Buchan et al. 2018</u>).				
	OX40L also known as CD252 and TNFSF4 is the ligand of CD134. Upon ligand binding, the receptor recruits TNF receptor associated factor (TRAF) proteins which triggers downstream signaling events including NFκB pathways. This activation can regulate the number of effector T cells that accumulate in primary and secondary responses and determine the frequency of T cells that are generated (<u>Croft 2010</u>). Mutations affecting CD134 signaling has been linked with Kaposi sarcoma as well as susceptibility to infections.				
	This clone Ber-ACT35 has been used in flow cytometry experiments to measure D134 expression levels on tumor-infiltrating Treg cells in mouse and human samples (<u>Vargas et al. 2018</u>).				
Purity	>95% by SDS PAGE				
Flow Cytometry	Use 10ul of the undiluted reagent to label 1×10^6 cells in 100ul				
Storage	Store at +4°C. DO NOT FREEZE. This product should be stored undiluted. This product is photosensitive and should be protected from light.				
Guarantee	Guaranteed for 12 months from the date of despatch or until the date of expiry, whichever comes first. Please see label for expiry date.				
Health And Safety Information	Material Safety Datasheet documentation #10041 available at: https://www.bio-rad-antibodies.com/SDS/MCA6116PE 10041
