

Datasheet: MCA6154GA

BATCH NUMBER 166410

Description:	MOUSE ANTI HUMAN C5/C5b
Specificity:	C5/C5b
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	568
Isotype:	IgG2a
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			
Western Blotting	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 0.1 mg/ml
External Database Links	UniProt:

Synonyms	CPAMD4
-----------------	--------

Specificity	Mouse anti Human C5/C5b antibody, clone 568 , recognizes an epitope on C5 and C5b. C5 is a component of all three complement activation pathways (classical, lectin and alternative), with all leading to its cleavage. C5 convertases cleave C5 into the anaphylatoxin C5a and C5b. The creation of C5b initiates the creation of the membrane attack complex (C5b-9) resulting in pathogenic cell lysis. This is achieved through the incorporation of the complex into bacterial cell walls, forming a pore, particularly in gram negative Neisseria strains (Merle et al. 2015).
--------------------	---

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
----------------	--

Guarantee	12 months from date of despatch
------------------	---------------------------------

Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA6154GA 10040
--------------------------------------	---

Regulatory	For research purposes only
