

## Datasheet: MCA6156GA

<b>Description:</b>	MOUSE ANTI HUMAN C5/C5a
<b>Specificity:</b>	C5/C5a
<b>Format:</b>	Purified
<b>Product Type:</b>	Monoclonal Antibody
<b>Clone:</b>	557
<b>Isotype:</b>	IgG2a
<b>Quantity:</b>	0.1 mg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			1/50
Western Blotting	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Human
<b>Product Form</b>	Purified IgG - liquid
<b>Preparation</b>	Purified IgG prepared by affinity chromatography on Protein G
<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative Stabilisers</b>	0.09% Sodium Azide (NaN <sub>3</sub> )
<b>Approx. Protein Concentrations</b>	IgG concentration 0.1 mg/ml
<b>Immunogen</b>	Human C5
<b>External Database Links</b>	<b>UniProt:</b>

<b>Specificity</b>	<p><b>Mouse anti Human C5/C5a antibody, clone 557</b>, recognizes an epitope on C5 and C5a. C5 is a component of all three complement activation pathways (classical, lectin and alternative), which lead to its cleavage by C5 convertase. Cleavage of C5 results in the formation of C5b, which initiates pathogenic lysis and C5a, a potent inflammatory mediator. C5a is a ligand for the G protein coupled receptors, C5aR1 and C5aR2 (also known as C5L2) through which its inflammatory functions are controlled (<a href="#">Merle et al. 2015</a>). These receptors are expressed ubiquitously but are found at its highest levels on the surface of immune cells, including macrophages, neutrophils and T cells. The inflammatory responses mediated by C5a are chemotaxis, leukocyte degranulation, vascular permeability and cytokine plus chemokine production. Beyond innate immunity, C5a plays a role in organ development, tissue regeneration and hematopoiesis (<a href="#">Zhang et al. 2017</a>).</p>

<b>Storage</b>	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p>
