<b>Specificity</b>	<p><b>Mouse anti Pig Siglec-10, clone 2E9</b> recognizes Siglec-10.</p> <p>Sialic-acid-binding immunoglobulin-like lectin (Siglecs) are cell surface receptors belonging to the immunoglobulin superfamily and recognize terminal sialic acids present in complex oligosaccharides of glycoproteins or glycolipids. Siglecs are mainly expressed on the cells of the immune systems and play a regulatory role, modulating inflammatory and immune responses. When expressed on transfected cells, porcine Siglec-10 is able to bind red blood cells in a sialic acid-dependent manner.</p> <p>Mouse anti Pig Siglec-10 antibody, clone 2E9 has been successfully used to examine Siglec-10 cell and tissue distribution in swine. Siglec-10 was found to be expressed on blood B cells (CD21<sup>+</sup> or CD79a<sup>+</sup>) and in B cell areas of the spleen and lymph nodes. Weak expression was also detected on monocytes (<a href="#">Escalona et al. 2014</a>).</p>
<b>Flow Cytometry</b>	Use 10ul of the suggested working dilution to label 1x10 <sup>6</sup> cells in 100ul
