

Datasheet: MCA6202GA

BATCH NUMBER 100005087

Description:	MOUSE ANTI HUMAN CCL20
Specificity:	CCL20
Other names:	MIP-3a
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	J03-4D4
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			1.0 ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Carrier Free	Yes
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml

Immunogen	<i>E. coli</i> derived recombinant human full length CCL20 (Ala27-Met96)
External Database Links	<p>UniProt: P78556 Related reagents</p> <p>Entrez Gene: 6364 CCL20 Related reagents</p>
Synonyms	LARC, MIP3A, SCYA20
Fusion Partners	Cell fusion between immunized BALB/c mouse spleen cells and mouse myeloma SP2/0
Specificity	<p>Mouse anti Human CCL20 antibody, clone J03-4D4, recognizes C-C motif chemokine 20, also known as LARC, MIP3A, and SCYA20. The chemokine CCL20 is expressed mostly in the lymphatic tissue, lung, and liver, and is produced by cells involved with the inflammatory and immune responses. CCL20 plays an important role in recruiting inflammatory cells to the site of infection or injury (Soto et al. 2017). However, CCL20 is involved with pathogenesis of chronic inflammatory disorders, specifically interstitial lung fibrosis and chronic obstructive pulmonary disease (COPD), and can contribute to tumor metastasis (Zhang et al. 2017). Inhibition of CCL20, along with its ligand CCR6, might have valuable therapeutic potential for treatment of autoimmune and inflammatory diseases, and is therefore a target of interest for drug discovery (Ranasinghe and Eri 2018).</p> <p>The purified Mouse anti Human CCL20 antibody, clone J03-4D4 (MCA6202GA) can be used as a capture antibody in a sandwich ELISA with the biotinylated Mouse anti Human CCL20 antibody, clone O03-3H12 (MCA6203B) as the detection antibody.</p>
Storage	<p>Store at +4°C or at -20°C if preferred.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	12 months from date of despatch
Health And Safety Information	<p>Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA6202GA 10040</p>
Regulatory	For research purposes only
