<b>Specificity</b>	<p><b>Mouse anti Human interleukin-11 antibody, clone D08-4C12</b>, recognizes interleukin-11 (IL-11), also known as AGIF. IL-11 belongs to the IL-6 family of cytokines, and plays a protective role in acute inflammatory settings (<a href="#">Traber et al. 2019</a>). IL-11 has both pro- and anti-inflammatory functions through activation of signaling cascades (<a href="#">Lokau et al. 2017</a>). IL-11 is largely absent in the body fluids of healthy people, but is upregulated in a series of diseases. IL-11 can be expressed in fibroblasts, and its inhibition has been suggested as a treatment for fibrotic disease (<a href="#">Schafer et al. 2017</a>), including fibrotic cardiovascular diseases (<a href="#">Ye et al. 2019</a>). A role of IL-11 has also been identified in development of inflammation-associated cancers, and its inhibition may be a therapeutic goal (<a href="#">Putoczki et al. 2013</a>).</p> <p>The purified Mouse anti Human interleukin-11 antibody, clone D08-4C12 (MCA6204GA) can be used as a capture antibody in a sandwich ELISA with the biotinylated Mouse anti Human interleukin-11 antibody, clone C16-4B8 (<a href="#">MCA6205B</a>) as the detection antibody.</p>
<b>Storage</b>	<p>Store at +4°C or at -20°C if preferred.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
