

Datasheet: MCA6207B

Description:	MOUSE ANTI HUMAN INTERLEUKIN-17A/F:Biotin
Specificity:	IL-17A/F
Format:	Biotin
Product Type:	Monoclonal Antibody
Clone:	I07-5E4
Isotype:	IgG2a
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			1.0 ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG conjugated to Biotin - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃) 1% Bovine Serum Albumin
Approx. Protein Concentrations	IgG concentration 0.1 mg/ml
Immunogen	<i>E. coli</i> derived recombinant human full length interleukin-17A/F (Gly24-Ala155)

Specificity	<p>Mouse anti Human interleukin-17A/F antibody, clone I07-5E4, recognizes interleukin-17 A and F. The IL-17 family consists of six proteins (IL-17A to IL-17F) which function as proinflammatory cytokines, important for defence against pathogens (Gurczynski and Moore, 2017). Accordingly, IL-17-producing CD4⁺ T helper cells, also called Th17 cells, play important roles in immune defense. Uncontrolled IL-17 signaling is associated with immunopathology, autoimmune diseases, and cancer, and blocking activity of IL-17 can be beneficial in some clinical settings (Amatya et al. 2017). This antibody recognizes IL-17A, the most studied member of the IL-17 family, and its closest relative IL-17F (Chen and Kolls 2017). These two proteins have similar structure and inflammatory function, but unique functions of IL-17F in the immune system have also been indicated (Chang and Dong, 2009).</p> <p>The biotinylated Mouse anti Human interleukin-17A/F antibody, clone I07-5E4 (MCA6207B) can be used as a detection antibody in a sandwich ELISA with the purified Mouse anti Human interleukin-17A/F antibody, clone D01-1C2 (MCA6206GA) as the capture antibody.</p>
--------------------	---

Storage	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p>
----------------	---

Guarantee	12 months from date of despatch
