<b>Specificity</b>	<p><b>Mouse anti Human GM-CSF antibody, clone E01-1B6</b>, recognizes Granulocyte-Macrophage Colony-Stimulating Factor (GM-CSF) also known as colony stimulating factor 2. GM-CSF is a cytokine and acts as a hematopoietic growth factor and immune modulator of various immune cells. It is produced by immune cells including T cells and macrophages as well as endothelial and fibroblast cells. GM-CSF has various functions such as roles in recruiting circulating neutrophils, monocytes and lymphocytes (<a href="#">Shi et al. 2006</a>). It is also involved in the maturation and activation of neutrophils and macrophages to induce microbial activity and the production of cytokines. GM-CSF elicits these functions through signaling via its receptor GM-CSFR to activate NF-kappaB or STAT5 signaling pathways (<a href="#">Dougan et al. 2019</a>).</p> <p>The purified Mouse anti Human GM-CSF antibody, clone E01-1B6 (MCA6230GA) can be used as a capture antibody in a sandwich ELISA with the biotinylated Mouse anti Human GM-CSF antibody, clone E04-5B11 (<a href="#">MCA6231B</a>) as the detection antibody.</p>
<b>Storage</b>	<p>Store at +4°C or at -20°C if preferred.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
