

Datasheet: MCA627GA

Description:	MOUSE ANTI BOVINE IgG1
Specificity:	IgG1
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	K37 2G6
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Bovine
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Carrier Free	Yes

Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Purified Bovine IgG1.
Fusion Partners	Spleen cells from immunized mice were fused with cells of the P3.X63.Ag8.653 myeloma cell line
Specificity	<p>Mouse anti Bovine IgG1, clone K37 2G6, recognizes bovine IgG1 and does not cross react with other subclasses.</p> <p>IgG1 along with IgG2 and IgG3 form the three major subclasses of bovine IgG. In bovids, IgG1 constitutes approximately 50% of serum immunoglobulin. IgG1. Unlike many other species, in ruminants and particularly bovids, IgG1 is major immunoglobulin present in milk and colostrum rather than IgA.</p> <p>In addition to clone K37 2G6, Bio-Rad offer clone IL-A60, which is also specific to bovine IgG1, along with a wide range of other antibodies specific to various bovine immunoglobulin and immunoglobulin subclasses.</p>

Storage	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p>
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: 10040: https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf
Regulatory	For research purposes only
