

Datasheet: MCA6300

Description:	RABBIT ANTI DESMIN
Specificity:	DESMIN
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	RM234
Isotype:	IgG
Quantity:	0.1 ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Immunohistology - Paraffin	▪			1/1000 - 1/4000
Western Blotting	▪			1/1000 - 1/2000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species

Human

Species Cross Reactivity

Reacts with: Mouse

Based on sequence similarity, is expected to react with: Bovine, Rat

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG - liquid

Preparation

Purified IgG prepared by affinity chromatography of Protein A from animal origin-free culture supernatant

Buffer Solution

Phosphate buffered saline

Preservative

0.09% Sodium Azide

Stabilisers 1% Bovine Serum Albumin
50% Glycerol

Immunogen A peptide corresponding to Human desmin

Specificity

Rabbit anti Human desmin antibody recognizes desmin (DES). Desmin is the intermediate filament protein in striated muscle, and maintains the structural and functional integrity of muscle cells ([Singh and Robbins 2018](#)). Mutations in the desmin gene, or post-translational modifications, cause skeletal and cardiac myopathies known as desmin related myopathies (DRMs) and include mitochondrial defects, cardiomyocyte death, muscle degeneration and other conditions ([Capetanaki et al. 2015](#)). Desmin is frequently down-regulated in cardiac pathology, and is believed to play a role in progression of heart failure ([Deliu et al. 2017](#)). Desmin expression is significantly expressed in colorectal cancer (CRC) and adenomas compared with normal colonic tissue and disrupts the function of the tumor suppressor p53, a mechanism which could explain the poor prognosis associated with high desmin expression ([Li et al. 2017](#)).

Storage

Store at -20°C only.
Storage in frost-free freezers is not recommended.
This product should be stored undiluted. Should this product contain a precipitate we recommend microcentrifugation before use

Guarantee

12 months from date of despatch

Health And Safety Information

Material Safety Datasheet documentation #10048 available at:
