

Datasheet: MCA6349

Description:	RABBIT ANTI PROSTATE SPECIFIC ANTIGEN
Specificity:	PROSTATE SPECIFIC ANTIGEN
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	RM323
Isotype:	IgG
Quantity:	0.1 ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Immunohistology - Paraffin	▪			1/500 - 1/1000
ELISA	▪			1/1000 - 1/5000
Western Blotting (1)	▪			1/1000 - 1/2500

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1)Use non-reduced conditions

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from animal origin-free culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative	0.09% Sodium Azide
Stabilisers	1% Bovine Serum Albumin 50% Glycerol
Immunogen	Native prostate specific antigen protein purified from human seminal fluid

Specificity

Rabbit anti prostate specific antigen antibody recognizes prostate-specific antigen, also known as PSA, semin, and KLK3.

Prostate specific antigen is a serine protease that functions in liquefaction of seminal fluid and remains localized to the prostate, with less than 1% released to circulation ([Cetinkaya et al. 2010](#)). Prostate specific antigen is produced by normal and cancerous prostate cells, and is not produced in significant quantities in any other tissue in men. Prostate specific antigen can be a diagnostic indicator for prostate cancer, and can be used to detect recurrence after local therapies and to follow response to systemic therapies for metastatic disease ([LeBeau et al. 2010](#)). Accordingly, prostate specific antigen testing has increased the number of men diagnosed with and treated for prostate cancer. However, the value of systematic screening with regard to mortality is uncertain ([Tikkinen et al. 2018](#)).

Storage

Store at -20°C only.
Storage in frost-free freezers is not recommended.
This product should be stored undiluted. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee

12 months from date of despatch
