Datasheet: MCA6365 BATCH NUMBER 169206

| Description: | RABBIT ANTI CDKN2A |
|---------------|---------------------|
| Specificity: | CDKN2A |
| Format: | Purified |
| Product Type: | Monoclonal Antibody |
| Clone: | RM409 |
| lsotype: | lgG |
| Quantity: | 0.1 ml |
| | |

Product Details

| Applications | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> . | | | | |

| Target Species | Human | | | | |
| Product Form | Purified IgG - liquid | | | | |
| Preparation | Purified IgG prepared by culture supernatant | affinity cł | nromatogi | raphy on Protein A fror | n animal origin-free |
| Buffer Solution | Phosphate buffered salir | ie | | | |
| Preservative | 0.09% Sodium Azide | | | | |
| Stabilisers | 1% Bovine Serum Album | nin | | | |
| | 50% Glycerol | | | | |
| Immunogen | A peptide corresponding | to the C- | terminus | of human CDKN2A | |
| External Database | UniProt: | | | | |

| Entrez Gene:1029CDKN2ARelated reagentsSynonymsCDKN2, MTS1SpecificityRabbit anti CDKN2A antibody recognizes cyclin-dependent kinase inhibitor 2A, also known as CDK4I, MTS-1 and p16-INK4.CDKN2A activation prevents carcinogenesis by activating senescence and arrest of cell growth. As such, it is upregulated in cellular senescence and functions as a tumor suppressor in a range of human cancers including colorectal cancer (Xing et al. 2013).CDKN2A inhibits the cell cycle proteins cyclin-dependent kinase 4 (CDK4) and CDK6.Loss of CDKN2A function can result in uncontrolled proliferation and neoplastic transformation (Shima et al. 2011). CDKN2A often undergoes DNA hypermethylation in cancer, including colorectal cancer (Xing et al. 2013).StorageStore at -20°C only. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Should this product contain a precipitate we recommend microcentrifugation before use.Guarantee12 months from date of despatchHealth And Safety InformationMaterial Safety Datasheet documentation #10048 available at: https://www.bio-rad-antibodies.com/SDS/MCA6365 10048RegulatoryFor research purposes only | Links | P42771 Related reagents |

| Synonyms CDKN2, MTS1 Specificity Rabbit anti CDKN2A antibody recognizes cyclin-dependent kinase inhibitor 2A, also known as CDK4I, MTS-1 and p16-INK4. CDKN2A activation prevents carcinogenesis by activating senescence and arrest of cell growth. As such, it is upregulated in cellular senescence and functions as a tumor suppressor in a range of human cancers including colorectal cancer (Xing et al. 2013). CDKN2A inhibits the cell cycle proteins cyclin-dependent kinase 4 (CDK4) and CDK6. Loss of CDKN2A function can result in uncontrolled proliferation and neoplastic transformation (Shima et al. 2011). CDKN2A often undergoes DNA hypermethylation in cancer, including colon cancer. This hypermethylation at the promoter region leads to silencing of the gene encoding CDKN2A and may lead to development, progression, and invasion of colorectal cancer (Xing et al. 2013). Storage Storage in frost-free freezers is not recommended. This product should be stored undiluted. Should this product contain a precipitate we recommend microcentrifugation before use.
