

Datasheet: MCA6412GA

BATCH NUMBER 100007677

Description:	MOUSE ANTI HUMAN FES
Specificity:	FES
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	AB04-4F6
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1,000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	<i>E. coli</i> -derived recombinant protein, aa 1-459 of human FES

Synonyms

FPS

Specificity

Mouse anti human FES antibody, clone AB04-4F6 recognizes tyrosine-protein kinase FES/FPS, otherwise known as feline sarcoma/fujinami avian sarcoma oncogene homolog, proto-oncogene c-FES, proto-oncogene c-FPS or p93c-FES.

FES is one of two members of a unique family of cytoplasmic protein tyrosine kinases, alongside tyrosine-protein kinase FER. This family of kinases contains a central src homology-2 (SH2) domain and a COOH-terminal tyrosine kinase catalytic domain and are distinct from other members of cytoplasmic protein tyrosine kinase subfamilies by the presence of NH2-terminal FER/CIP4 homology and coiled-coil domains ([Sangrar et al. 2005](#)). Studies initially suggested that mutations in FES contribute to the development of some cancers ([Ley et al. 2003](#)). However, more recent research has shown that FES may act a tumor suppressor in colorectal cancer ([Delfino et al. 2006](#)).

Western Blotting

Mouse anti Human FES antibody detects a band of 94 kDa in THP-1 cell lysate

Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee

12 months from date of despatch
