

Datasheet: MCA6414GA

BATCH NUMBER 100007679

Description:	MOUSE ANTI HUMAN IRS2
Specificity:	IRS2
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	G01-8F7
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	■			1/500

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	<i>E. coli</i> -derived recombinant protein, aa 1035-1338 of human IRS2

Specificity	Mouse anti human IRS2 antibody, clone G01-8F7 recognizes insulin receptor substrate 2. IRS2 is a cytoplasmic signaling molecule. IRS2 along with IRS1, is a key target of the insulin receptor tyrosine kinase. Serine/threonine phosphorylation of IRS2 has been shown to regulate insulin sensitivity, suggesting that it is required for hormonal control of metabolism (Copps and White, 2012). Reduced expression of IRS2 has been shown to result in type 2 diabetes and reduced brain mass in mice (Lin et al. 2004 , Schubert et al. 2003)
Western Blotting	Mouse anti Human IRS2 antibody detects a band of 180 kDa in THP-1 cell lysates
Storage	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p>
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA6414GA 10040
Regulatory	For research purposes only
