Datasheet: MCA6425GA BATCH NUMBER 100007874

Description:	MOUSE ANTI HUMAN INTERLEUKIN-17A
Specificity:	IL-17A
Other names:	CTLA-8
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	A01-3G2
Isotype:	lgG1
Quantity:	0.1 mg

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .

Target Species	Human				
Product Form	Purified IgG - liquid				
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant				
Buffer Solution	Phosphate buffered salin	e			
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)				
Carrier Free	Yes				
Approx. Protein Concentrations	IgG concentration 1.0 mg	g/ml

The IL-17 family consists of six proteins (IL-17A to IL-17F) which function as pro-inflammatory cytokines important in the defense against pathogens (Gurcaynski & Moore 2017). This antibody recognizes IL-17A, the most studied member of the IL-17 family. IL-17A is expressed by various cell types including CD4* and CD8* T helper cells, neutrophil, natural killer, mast and B cells (Chen & Kolls 2012). It elicits its responses via the IL-17 receptor, IL-17A. Activation of this receptor leads to the activation of Target genes which play key roles in inflammation. IL-17A can also signal to stabilize mRNA transcripts, again to enhance the production of genes including those encolinical settings (Amatya <i>et al.</i> 2017). Storage This product is shipped at ambient temperature. It is recommended to aliquut and store at -20*C on receipt. When thawed, aliquut the sample as needed. Keep aliquots at 2-8*C for short tem use (up to 4 weeks) and store the remaining aliquots at -20*C. Storage This product is shipped at ambient temperature. It is recommended to aliquut and store at -20*C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8*C for short tem use (up to 4 w		
3605 IL17A Related reagents Synonyms CTLAB, IL17 Fusion Partners Cell fusion between immunized BALB/c mouse spleen cells and mouse myeloma SP2/0 Specificity Mouse anti Human interleukin-17A, clone A01-3G2, recognizes interleukin-17A (IL-17A) also known as cytotoxic T-lymphocyte-associated antigen 8 (CTLA-8). The IL-17 family consists of six proteins (IL-17A to IL-17F) which function as pro-inflammatory cytokines important in the defense against pathogens (Gurczynski & Moore 2017). This antibody recognizes IL-17A, the most studied member of the IL-17 family. IL-17A is expressed by various cell types including CD4* and CD8* T helper cells, neutrophil, natural killer, mast and B cells (Chen & Kolls 2017). It elicits its responses via the IL-17 receptor, IL-17RA. Activation of this receptor leads to the activation of NF-xB and mitogen-activated protein kinase to then drive the transcriptional activation of target genes which play key roles in inflammation. IL-17A can also signal to stabilize mRNA transcripts, again to enhance the production of genes including those encoding cytokines, chemokines, antimicrobial peptides and other inflammatory effectors. (Monin & Gaffen 2018). Uncontrolled IL-17A signaling is associated with immunopathology, autoimmune diseases, and cancer, and blocking activity of IL-17A can be beneficial in some clinical settings (Amatya <i>et al.</i> 2017). Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is n		
Fusion Partners Cell fusion between immunized BALB/c mouse spleen cells and mouse myeloma SP2/0 Specificity Mouse anti Human interleukin-17A, clone A01-3G2, recognizes interleukin-17A (IL-17A) also known as cytotxic T-lymphocyte-associated antigen 8 (CTLA-8). The IL-17 family consists of six proteins (IL-17A to IL-17F) which function as pro-inflammatory cytokines important in the defense against pathogens (Gurczynski & Moore 2017). This antibody recognizes IL-17A, the most studied member of the IL-17 family. IL-17A is expressed by various cell types including CD4* and CD8* T helper cells, neutrophil, natural killer, mast and B cells (Chen & Kolls 2017). It elicits its responses via the IL-17 receptor, IL-17RA. Activation of this receptor leads to the activation of NF-kB and mitogen-activated protein kinase to then drive the transcriptional activation of target genes which play key roles in inflammaton. IL-17A can also signal to stabilize mRNA transcripts, again to enhance the production of genes including those encoding cytokines, chemokines, antimicrobial peptides and other inflammatory effectors. (Monin & Caffen 2018). Uncontrolled IL-17A signaling is associated with immunopathology, autoimmune diseases, and cancer, and blocking activity of IL-17A can be beneficial in some clinical settings (Amatya <i>et al.</i> 2017). The purified Mouse anti Human interleukin-17A antibody, clone A01-3G2 (MCA6425GA) can be used as a capture antibody in a sandwich ELISA with the biotinylated Mouse anti Human interleukin-17A antibody, clone F01.1-5D10 (MCA6243B) as the detection antibody. Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining
