**Specificity**

**Mouse anti human IRF9 antibody, clone I01/8C10** recognizes Interferon regulatory factor 9 protein, also known as IRF9 or IFN-alpha-responsive transcription factor subunit.

IRF9 is a protein coding gene, and is a member of the interferon regulatory factor (IRF) family. IRF9 has an important role in mediating the type 1 interferon antiviral response and as such has a vital role as a transcription factor.

---

**Western Blotting**

Mouse anti human IRF9 antibody detects a band of approximately 52 kDa in THP1 cell lysates.

**Storage**

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
