

Datasheet: MCA6433GA

BATCH NUMBER 100007873

Description:	MOUSE ANTI HUMAN GAB1
Specificity:	GAB1
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	F01/9A4-2
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1,000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein G from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	<i>E. coli</i> -derived recombinant protein, aa 243-694 of human GAB1.

Specificity

Mouse anti human GAB1 antibody, clone F01/9A4-2 recognizes GRB2-associated-binding protein 1, also known as GAB1, GRB2-associated binder 1 or Growth factor receptor bound protein 2-associated protein 1 when phosphorylated at tyrosine 627.

GAB1 is a docking protein capable of interactions with several different proteins particularly the activation of receptor tyrosine kinase signaling. Phosphorylation of GAB1 at tyrosine 627 leads to SHP2 recruitment and subsequent activation of MAPK signaling.

Western Blotting

Mouse anti human GAB1 detects a band of approximately 102 kDa in HepG2 cell lysates.

Storage

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

Guarantee

12 months from date of despatch

**Health And Safety
