

Datasheet: MCA6434GA

Description:	MOUSE ANTI HUMAN CYTOKERATIN (PAN REACTIVE)
Specificity:	CYTOKERATIN PAN REACTIVE
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	C-11
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry (1)	▪			1/100
Immunohistology - Frozen	▪			
Immunohistology - Paraffin (2)	▪			
Immunoprecipitation	▪			
Western Blotting	▪			
Immunofluorescence	▪			
Rare Cell / CTC Enumeration	▪			1/200

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1)Membrane permeabilization is required for this application. The use of Leucoperm (Product Code [BUF09](#)) is recommended for this purpose.

(2)This product requires protein digestion pre-treatment of paraffin sections e.g. trypsin or pronase.

Target Species	Human
-----------------------	-------

Species Cross Reactivity	Based on sequence similarity, is expected to react with:Mammals N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.
---------------------------------	---

Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	<0.1% Sodium Azide (NaN ₃)
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Keratin-enriched preparation from human epidermoid carcinoma cell line A431

Specificity **Mouse anti human cytokeratin (Pan reactive) antibody, clone C-11** recognizes the human cytokeratins 4, 5, 6, 8, 10, 13 and 18.

Cytokeratins, also known as keratins, form a subfamily of cytoplasmic proteins expressed in epithelial cells where they form intermediate filaments responsible for providing cells resistance to mechanical stress. Cytokeratins are characterized by their remarkable biochemical diversity, with epithelial tissues expressing at least 20 different cytokeratins

(cytokeratin 1 to 20) divided into type I cytokeratins (acidic cytokeratins 9 to 20) and type II cytokeratins (basic to neutral cytokeratins 1 to 8) subfamilies. Cytokeratin expression profile is largely specific to particular organs and tissues and their development stage. That tissue-specific expression profile of cytokeratins is usually retained upon epithelial cell transformation and is therefore used in clinic to identify the cells from which carcinomas originated from.

Mouse anti Human Cytokeratin (Pan reactive) antibody, clone C-11, has been validated for use on the [Genesis Cell Isolation System with the CelSelect Slide™ technology](#).

Flow Cytometry Use 10ul of the suggested working dilution to label 1×10^6 cells in 100ul.
