

Datasheet: MCA685S

Description:	MOUSE ANTI HUMAN MBP (aa67-74)
Specificity:	MBP (aa67-74)
Other names:	MYELIN BASIC PROTEIN
Format:	S/N
Product Type:	Monoclonal Antibody
Clone:	26
Isotype:	IgG1
Quantity:	2 ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen	▪			
Immunohistology - Paraffin			▪	
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting			▪	

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Tissue Culture Supernatant - liquid
Preparation	Tissue Culture Supernatant containing 0.1M Tris/HCl and foetal calf serum.
Preservative Stabilisers	0.09% Sodium Azide
Immunogen	Human myelin basic protein.

RRID	AB_325009
-------------	-----------

Fusion Partners	Spleen cells from immunized mice were fused with cells of the mouse SP2/0 myeloma cell line.
------------------------	--

Specificity	Mouse anti MBP antibody, clone 26 recognizes an epitope between amino acids 67 and 74 of human myelin basic protein, also known as MBP, Myelin A1 protein or Myelin membrane encephalitogenic protein. MBP is a 304 amino acid ~33 kDa abundant component of the myelin membrane. There are 6 potential isoforms of MBP generated by alternative splicing, 4 of which lack the N-terminal region containing the immunogen sequence. Mouse anti MBP antibody, clone 26 is expected to recognize isoforms 1 and 2 (UniProt: P02686). The N-terminal region of MBP is highly conserved and Mouse anti MBP antibody, clone 26 is expected to be broadly species cross reactive for isoforms maintaining the N-terminal region.
