

## Datasheet: MCA686S

**BATCH NUMBER 170505**

<b>Description:</b>	MOUSE ANTI HUMAN MBP (aa84-89)
<b>Specificity:</b>	MBP (aa84-89)
<b>Other names:</b>	MYELIN BASIC PROTEIN
<b>Format:</b>	S/N
<b>Product Type:</b>	Monoclonal Antibody
<b>Clone:</b>	22
<b>Isotype:</b>	IgG2b
<b>Quantity:</b>	2 ml

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen	▪			
Immunohistology - Paraffin	▪			
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting			▪	

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Human
<b>Product Form</b>	Tissue Culture Supernatant - liquid
<b>Preservative Stabilisers</b>	0.05% Sodium Azide
<b>Immunogen</b>	Human myelin basic protein.

<b>Specificity</b>	<b>Mouse anti MBP antibody, clone 22</b> recognizes an epitope between amino acids 84 and 89 of human myelin basic protein, also known as MBP, Myelin A1 protein or Myelin membrane encephalitogenic protein. MBP is a 304 amino acid ~33 kDa abundant component of the myelin membrane. There are 6 potential isoforms of MBP generated by alternative splicing, 4 of which lack the N-terminal region containing the immunogen sequence. Mouse anti MBP antibody, clone 22 is expected to recognize isoforms 1 and 2 ( <a href="#">UniProt: P02686</a> ). The N-terminal region of MBP is highly conserved and Mouse anti MBP antibody, clone 22 is expected to be broadly species cross reactive for isoforms maintaining the N-terminal region. Mouse anti MBP antibody, clone 22 has been reported as suitable for use in western blotting ( <a href="#">Chignola et al. 2000</a> ).
