

Datasheet: MCA70 BATCH NUMBER 080113

Description:	MOUSE ANTI BOVINE MBP (aa129-138)
Specificity:	MBP (aa129-138)
Other names:	MYELIN BASIC PROTEIN
Format:	S/N
Product Type:	Monoclonal Antibody
Clone:	1
lsotype:	lgG2a
Quantity:	2 ml

Product Details

Applications	This product has been reported to work in the following applications. This information is						
	e e	derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further					
		-					
	information. For general protocol recommendations, please visit <u>www.bio-</u>						
	rad-antibodies.com/protocols.						
		Yes	No	Not Determined	Suggested Dilution		
	Flow Cytometry						
	Immunohistology - Frozen	-			1/10		
	Immunohistology - Paraffin						
	ELISA	-			1/200 - 1/1000		
	Immunoprecipitation			•			
	Western Blotting			•			
	Where this product has not been tested for use in a particular technique this does not						
	a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.						
Target Species	Bovine						
Species Cross Reactivity	Reacts with: Rat, Human N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.						
Product Form	Tissue Culture Supernatant - liquid Tissue Culture Supernatant containing 0.1M Tris/HCl pH7.4 and 5-10% foetal calf serum						
Preparation							

0.05% Sodium Azide
Bovine Myelin Basic Protein (MBP).
UniProt: <u>P02687</u> <u>Related reagents</u> Entrez Gene: <u>618684</u> MBP <u>Related reagents</u>
AB_2140358
Spleen cells from immunised NIH mice were fused with cells of the NS0 mouse myeloma cell line.
Mouse anti Bovine MBP (aa129-138) antibody, clone 1 recognizes myelin basic protein MBP). Clone 1 is reactive with an epitope in the 129-138 region of the human MBP nolecule. The numbering of MBP residues is that as described by Martenson Martenson, R. E., 1984.

Groome, N.P. <i>et al.</i> (1986) Region-specific immunoassays for human myelin basic protein. <u>J Neuroimmunol. 12 (4): 253-64.</u> Marignier, R. <i>et al.</i> (2010) Oligodendrocytes are damaged by neuromyelitis optica mmunoglobulin G via astrocyte injury. <u>Brain. 133 (9): 2578-91.</u> Brunner, C. <i>et al.</i> (1989) Differential ultrastructural localization of myelin basic protein, nyelin/oligodendroglial glycoprotein, and 2',3'-cyclic nucleotide 3'-phosphodiesterase in the CNS of adult rats. <u>J Neurochem. 52: 296-304.</u> Jatana, M. <i>et al.</i> (2006) Combination of systemic hypothermia and N-acetylcysteine attenuates hypoxic-ischemic brain injury in neonatal rats. <u>Pediatr Res. 59: 684-9.</u> Chujor, C.S. <i>et al.</i> (1991) Serum antibodies against peripheral nervous system antigens in leprosy. Int J Lepr Other Mycobact Dis. 59: 590-7.
Store at +4°C or at -20°C if preferred. This product should be stored undiluted. Storage in frost free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we ecommend microcentrifugation before use.

Guarantee	12 months from date of despatch
