Datasheet: MCA709EL BATCH NUMBER 156444

| Description: | RAT ANTI HUMAN CD28:Low Endotoxin |
|---------------|-----------------------------------|
| Specificity: | CD28 |
| Format: | Low Endotoxin |
| Product Type: | Monoclonal Antibody |
| Clone: | YTH913.12 |
| lsotype: | lgG2b |
| Quantity: | 0.5 mg |
| | |

Product Details

| Applications | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> . | | | | | | |
|-----------------------------|--|-----|----|-------------------|--------------------|--|--|
| | | Yes | No | Not Determined | Suggested Dilution | | |
| | Flow Cytometry | - | | | 1/50 - 1/100 | | |
| | Immunohistology - Frozen | | | | | | |

| Fusion Partners | Spleen cells from an immunized DA rat were fused with cells on myeloma cell line. | of the Y3/Ag 1.2.3 rat | | | |
| Specificity | Rat anti Human CD28 antibody, clone YTH913.12 recognizes human CD28, a ~44 kDa single pass type 1 trans-membrane protein expressed as a homodimer on a major subset of human T-cells (Thompson <i>et al.</i> 1989), responsible for activation of these cells via interaction with the TCR. CD28 is involved in the tuning of the T-cell for activation via TCR, lowering the threshold for activation from around 8000 triggered TCRs to approximately 1500 (Viola <i>et al.</i> 1996). CD28 along with CD152, also known as CTLA-4 acts as a co-receptor for the co-stimulatory molecules CD80 and CD86 (Azuma <i>et al.</i> 1993). CD28 offers a positive stimulatory role on ligation of CD80 and CD86 while CTLA-4 offers a negative feedback signal preventing CD28 mediated T-cell activation of CD86 (Krummel <i>et al.</i> 1995). Rat anti human CD28, clone YTH913.12 has been reported to recognize an epitope of CD28 expressed by NK cells, which is not recognized by other anti human CD28 clones such as 9.3 and CD28.2 (Galea-Lauri <i>et al.</i> 1999.) Other reports however have failed to demonstrate CD28 staining on peripheral blood derived NK cells using clone YTH913.12 (Wilson <i>et al.</i> 1999). | | | | |
| Flow Cytometry | Use 10ul of the suggested working dilution to label 10 ⁶ cells ir | 100ul. | | | |

Storage Store at -20°C only.

This product should be stored undiluted.

Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
