# Datasheet: MCA709SBY720 BATCH NUMBER 100007329

Description:	RAT ANTI HUMAN CD28:StarBright Yellow 720				
Specificity:	CD28				
Format:	StarBright Yellow 720				
Product Type:	Monoclonal Antibody				
Clone:	YTH913.12				
Isotype:	lgG2b				
Quantity:	100 TESTS/0.5ml				

## **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .						
		Yes	No	Not Determined	Suggested Dilution		
	Flow Cytometry	•			Neat		
	Where this product has necessarily exclude its a guide only. It is recom system using appropria	use in such pro nmended that t	ocedure he user	es. Suggested working titrates the product f	g dilutions are given as		
Target Species	Human						
Product Form	Purified IgG conjugated	I to StarBright	Yellow	720 - liquid			
Max Ex/Em	_	Excitation Max 548	(nm)	Emission Max (nm) 719			
	StarBright Yellow 720	546		719			
Preparation	Purified IgG prepared b supernatant	y affinity chron	natogra	phy on Protein G fror	n tissue culture		
Buffer Solution	Phosphate buffered sal	ine					
Preservative	0.09% Sodium Azide (N	NaN <sub>3</sub> )					
Stabilisers	1% Bovine Serum Albumin						
	0.1% Pluronic F68						
	0.1% PEG 3350						
	0.05% Tween 20						

Immunogen	Human peripheral blood T-cells						
External Database Links	UniProt: P10747 Related reagents Entrez Gene: 940 CD28 Related reagents						
Fusion Partners	Spleen cells from an immunised DA rat were fused with cells of the Y3/Ag 1.2.3 rat myeloma cell line						
Specificity	<b>Rat anti Human CD28 antibody, clone YTH913.12</b> recognizes human CD28, a ~44 kDa single pass type 1 trans-membrane protein expressed as a homodimer on a major subset of human T-cells ( <u>Thompson <i>et al.</i> 1989</u> ), responsible for activation of these cells via interaction with the TCR. CD28 is involved in the tuning of the T-cell for activation via TCR, lowering the threshold for activation from around 8000 triggered TCRs to approximately 1500 ( <u>Viola <i>et al.</i> 1996</u> ).						
	CD28 along with CD152, also known as CTLA-4 acts as a co-receptor for the co-stimulatory molecules CD80 and CD86 (Azuma <i>et al.</i> 1993). CD28 offers a positive stimulatory role on ligation of CD80 and CD86 while CTLA-4 offers a negative feedback signal preventing CD28 mediated T-cell activation of CD86 (Krummel <i>et al.</i> 1995).						
	Rat anti human CD28, clone YTH913.12 has been reported to recognize an epitope of CD28 expressed by NK cells, which is not recognized by other anti human CD28 clones such as 9.3 and CD28.2 ( <u>Galea-Lauri <i>et al</i> 1999.</u> ) Other reports however have failed to demonstrate CD28 staining on peripheral blood derived NK cells using clone YTH913.12 (Wilson <i>et al.</i> 1999).						
Flow Cytometry	Use 5ul of the suggested working dilution to label 10 <sup>6</sup> cells in 100ul. Best practices suggest a 5 minutes centrifugation at 6,000g prior to sample application.
