Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. 1mM EDTA buffer pH 8.0 is recommended for this purpose.

Specificity	Mouse anti Human Prolactin antibody, clone INN-hPRL-1 recognises human prolactin, also known as luteotropic hormone or luteotropin, binding to epitope 'c' as determined by a competitive binding assay (Staindl <i>et al.</i> 1987). Prolactin is a 199 amino acid ~24 kDa secreted anterior pituitary hormone acting to promote lactation.
Histology Positive Control Tissue	Human Pituitary
