

## Datasheet: MCA743T BATCH NUMBER 165377

Description:	MOUSE ANTI HUMAN CD49b		
Specificity:	CD49b		
Other names:	INTEGRIN ALPHA 2 CHAIN, VLA-2		
Format:	Purified		
Product Type:	Monoclonal Antibody		
Clone:	AK7		
Isotype:	lgG1		
Quantity:	25 µg		

#### **Product Details**

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u>.

Flow Cytometry       •       1/50 - 1/100         Immunohistology - Frozen       1/500 - 1/1000         Inmunohistology - Paraffin       •         ELISA       •         Immunoprecipitation       •         Western Blotting       •         Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given at a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.         (1)The epitope recognised by this antibody is reported to be sensitive to formaldehyde fixation and tissue processing. Bio-Rad recommends the use of acetone fixation for frozen sections.         Target Species       Human         Reacts with: Cynomolgus monkey, Rhesus Monkey, Baboon			0010.					
Immunohistology - Frozen (1)       1/500 - 1/1000         Immunohistology - Paraffin       1/500 - 1/1000         ELISA       1         Immunoprecipitation       1/500 - 1/1000         Western Blotting       Western Blotting         Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.         (1)The epitope recognised by this antibody is reported to be sensitive to formaldehyde fixation and tissue processing. Bio-Rad recommends the use of acetone fixation for frozen sections.         Farget Species       Human         Reacts with: Cynomolgus monkey, Rhesus Monkey, Baboon         N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for			Yes	No	Not Determined	Suggested Dilution		
(1)       Immunohistology - Paraffin         ELISA       Immunoprecipitation         Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given at a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.         (1)       (1)         (2)       (1)         (3)       (2)         (4)       (2)         (5)       (2)         (5)       (2) <td></td> <td>Flow Cytometry</td> <td>•</td> <td></td> <td></td> <td>1/50 - 1/100</td>		Flow Cytometry	•			1/50 - 1/100		
(1)       Immunohistology - Paraffin         Immunohistology - Paraffin       •         ELISA       •         Immunoprecipitation       •         Western Blotting       •         Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.         (1)The epitope recognised by this antibody is reported to be sensitive to formaldehyde fixation and tissue processing. Bio-Rad recommends the use of acetone fixation for frozen sections.         Target Species       Human         Reacts with: Cynomolgus monkey, Rhesus Monkey, Baboon         N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Product Form	Purified IgG - liquid			
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant			
Buffer Solution	Phosphate buffered saline			
Preservative Stabilisers	0.09% Sodium Azide			
Carrier Free	Yes			
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml			
External Database Links	UniProt:         P17301       Related reagents         Entrez Gene:         3673       ITGA2         Related reagents			
Synonyms	CD49B			
RRID	AB_2265115			
Fusion Partners	Spleen cells from immunised mice were fused with cells of the mouse NS1 myeloma cell line.			
Specificity	<b>Mouse anti Human CD49b antibody, clone AK7</b> recognizes the integrin alpha 2 subunit, a ~160 kDa glycoprotein that non-covalently associates with the ~130 kDa integrin beta 1 subunit to form the VLA-2 complex.			
	CD49b is expressed by platelets, long term cultivated T cells, approximately 50% of monocytes and most adherent cell lines.			
	Mouse anti Human CD49b antibody, clone AK7 inhibits cell attachment to collagen.			
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 <sup>6</sup> cells in 100ul.			
Histology Positive Control Tissue	Tonsil

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.				
	Avoid repeated freezing and thawing as this may denature the antibody. Storage in				
	frost-free freezers is not recommended.				
Guarantee	12 months from date of despatch
