

Datasheet: MCA750

Description:	MOUSE ANTI GUINEA PIG CD90
Specificity:	CD90
Format:	Con S/N
Product Type:	Monoclonal Antibody
Clone:	CT4
Isotype:	IgG3
Quantity:	0.25 ml

Product Details

RRID AB_321960

Applications This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			1/100 - 1/1000
Immunohistology - Frozen	▪			1/100 - 1/1000
Immunohistology - Paraffin			▪	
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting			▪	

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species Guinea Pig

Product Form Tissue Culture Supernatant - liquid

Preservative 0.09% Sodium Azide (NaN₃)
Stabilisers 0.7% Bovine Serum Albumin

Immunogen Peritoneal T-cells.

Fusion Partners Spleen cells from immunised BALB/c mice were fused with cells of the X63.Ag8.653 mouse myeloma cell line.

Specificity **Mouse anti Guinea Pig CD90 antibody, clone CT4** recognizes guinea pig THY-1 (CD90), a small but heavily glycosylated member of the immunoglobulin superfamily. Clone CT4 was originally identified as recognizing a guinea pig homing receptor ([Kraal et al. 1986](#)) and later confirmed as recognizing the guinea pig homologue of human and rodent CD90 ([Schäfer et al. 1999](#)) by purification and microsequencing. Guinea Pig CD90 is notable for its level of N-linked glycosylation,

rendering it an apparent molecular mass of ~36 kDa, higher than that seen in most other species where CD90 has been identified and characterized.

Guinea pig CD90 (according to Uniprot entry Q9WUR5) demonstrates 82% amino acid identity with human CD90, 74% with murine CD90 and 76% with rat.

Guinea pig CD90 is highly expressed in the brain and unlike other species is also expressed on most resting B lymphocytes ([Schäfer et al. 1999](#))

Mouse anti Guinea Pig CD90 antibody, clone CT4 has been used extensively for the flow cytometric analysis of guinea pig cell populations ([Gupta et al. 2012](#)).

Flow Cytometry Use 10ul of the suggested working dilution to label 10⁶ cells in 100ul.

Storage Store at +4°C or at -20°C if preferred.
Storage in frost-free freezers is not recommended.
This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Shelf Life 18 months from date of despatch.
