

# Datasheet: MCA756PE

Description:	MOUSE ANTI HUMAN CD64:RPE
Specificity:	CD64
Other names:	FcRI
Format:	RPE
Product Type:	Monoclonal Antibody
Clone:	10.1
lsotype:	lgG1
Quantity:	100 TESTS

## **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal						
	communications from the originators. Please refer to references indicated for further						
	information. For general protocol recommendations, please visit <u>www.bio-</u> rad-antibodies.com/protocols.						
	Yes No Not Determined Suggested Dilution						
	Flow Cytometry	-			Neat - 1/10		
	Where this product has not been tested for use in a particular technique this does not						
	necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.						
Target Species	Human						
Species Cross Reactivity	Reacts with: Baboon, Cynomolgus monkey, Rhesus Monkey <b>N.B.</b> Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.						
Product Form	Purified IgG conjugated to R. Phycoerythrin (RPE) - lyophilized						
Reconstitution	Reconstitute with 1.0 r	ml distilled wa	ater				
Max Ex/Em	Fluorophore	Excitation M	lax (nm)	Emission Max (nm)			
	RPE 488nm laser	496		578			
Preparation	Purified IgG prepared supernatant	by affinity ch	romatogra	aphy on Protein A from	n tissue culture		

Buffer Solution	
Butter Solution	Phosphate buffered saline
Preservative	0.09% Sodium Azide
Stabilisers	1% Bovine Serum Albumin
	5% Sucrose
Immunogen	Human monocytes
External Database	
Links	UniProt:
	P12314 Related reagents
	Entrez Gene:
	2209 FCGR1A Related reagents
C	
Synonyms	FCG1, FCGR1, IGFR1
RRID	AB 321800
	AB_021000
Fusion Partners	Spleen cells from immunised BALB/c mice were fused with cells of the mouse
	SP2/0-Ag14 myeloma cell line
Specificity	Mouse anti Human CD64 antibody, clone 10.1 recognizes the human CD64 cell surface
	antigen, a ~75 kDa glycoprotein expressed by monocytes. The antigen acts as a high
	affinity receptor for human IgG, and is also known as FcRI.
	Mouse anti Human CD64 antibody, clone 10.1 blocks binding of immunoglobulin to FcRI.
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 <sup>6</sup> cells in 100ul.
