

Datasheet: MCA918GA

BATCH NUMBER 0313

Description:	MOUSE ANTI SHEEP CD32-Like
Specificity:	CD32-Like
Other names:	FcRII
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	VPM63
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			1/25 - 1/200
Immunohistology - Frozen	▪			
Immunohistology - Paraffin			▪	
ELISA			▪	
Immunoprecipitation			▪	
Western Blotting			▪	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Sheep
Product Form	Purified IgG - liquid
Preparation	Purified IgG prepared by affinity chromatography on Protein A from tissue culture supernatant
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)

Carrier Free	Yes
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml
Immunogen	Ovine macrophages.
Fusion Partners	Spleen cells from immunised BALB/c mice were fused with cells of the mouse NS0 myeloma cell line
Specificity	<p>Mouse anti Sheep CD32-Like, clone VPM63 recognizes a cell surface antigen of 40-42 kDa which is similar to the human cell surface antigen designated as CD32. It has therefore been hypothesized that clone VPM63 may recognise a minor isoform of the ovine homologue of human CD32 (Hopkins et. al. 1996).</p> <p>CD32 is one of a group of Fc receptors belonging to the immunoglobulin superfamily and involved in phagocytosis of opsonized microbes. CD32, also known as the Fc gamma RII, acts as a low affinity receptor for IgG. The antigen mediates several functions including endocytosis, activation of secretion, cytotoxicity and immunomodulation.</p> <p>Mouse anti Sheep CD32-Like, clone VPM63 has been shown to recognize an antigen expressed by macrophages and monocytes but not by lymphocytes and shows strong staining of alveolar macrophages in flow cytometry.</p> <p>In addition to clone VPM63, clone CCG36, an antibody directed against bovine CD32 but cross reacting with ovine CD32 is also available. Clone CCG36 is available in both unconjugated and conjugated formats.</p>
Flow Cytometry	Use 10ul of the suggested working dilution to label 1×10^6 cells in 100ul
References	1. Hopkins, J. & Gupta, V.K. (1996) Identification of three myeloid-specific differentiation antigens in sheep. Vet Immunol Immunopathol. 52 (4): 329-39.
Storage	<p>Store at +4°C or at -20°C if preferred.</p> <p>This product should be stored undiluted.</p> <p>Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/MCA918GA10040
Regulatory	For research purposes only
