**Specificity** **Mouse IgG1 negative control** is negative by flow cytometry on all human cells and cell lines tested. Further tests have also shown that this reagent is also suitable for use as a negative control with bovine (Maslanka *et al*, 2012), ovine, porcine ([Kapetanovic \*et al.\* 2012](#)), equine ([Jacks \*et al.\* 2007](#)), canine ([Maiolini \*et al.\* 2012](#)), lapine ([Pakandl \*et al.\* 2008](#)) and guinea-pig tissues.

***This reagent recognizes a rat cell surface marker, and therefore cannot be used as a negative control in this species.***

---

**Flow Cytometry** Use 10ul of the suggested working dilution to label 10<sup>6</sup> separated cells or 100ul lysed whole peripheral blood.
