

Datasheet: MCA929PE

BATCH NUMBER 1710

Description:	MOUSE IgG2a NEGATIVE CONTROL:RPE
Specificity:	MOUSE IgG2a NEGATIVE CONTROL
Format:	RPE
Product Type:	Negative/Isotype Control
Isotype:	IgG2a
Quantity:	100 TESTS

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	•			*

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. * It is recommended that the user dilutes the antibody for use in their own system to a concentration equivalent to their test reagent.

Target Species	Negative Control	Negative Control				
Product Form	Purified IgG conjuga	ated to R. Phycoerythrin	(RPE) - lyophilized			
Reconstitution	Reconstitute with 1.0	0 ml distilled water				
lax Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm			
	RPE 488nm laser	496	578			
reparation	Purified IgG prepare supernatant	ed by affinity chromatogo	raphy on Protein G			
	•	, , ,	raphy on Protein G			
Buffer Solution Preservative	supernatant	saline	raphy on Protein G			
Preparation Buffer Solution Preservative Stabilisers	supernatant Phosphate buffered	saline	raphy on Protein G			

Immunogen	Activated rat T-helper cells.				
RRID	AB_322272				
Fusion Partners	Spleen cells from immunised BALB/c mice were fused with cells of the NS1 mouse myeloma cell line.				
Specificity	Mouse IgG2a negative control antibody, clone OX-34 is suitable for use as a negative control reagent for the measurement of non-specific binding of mouse monoclonal antibodies of isotype IgG2a to human tissue.				
	Clone MRC OX-34 recognises a rat cell surface marker, and therefore cannot be used as a negative control in this species.				
	This product is routinely tested in flow cytometry on rat splenocytes to confirm antibody activity and on human whole blood to test for suitability as a negative control.				
	Test results have shown that MCA929 is also suitable for use as a negative control with bovine, ovine, porcine, equine, canine, lapine and guinea-pig tissues.				
	This antibody may not be suitable for intracellular staining on some cell types.				
Flow Cytometry	Use 10ul of the suggested working dilution to label 10 ⁶ cells in 100ul.

Storage	Prior to reconstitution store at +4°C. Following reconstitution store at +4°C.				
	DO NOT FREEZE.				
	This product should be stored undiluted. This product is photosensitive and should be protected from light. Should this product contain a precipitate we recommend microcentrifugation before use.				
Guarantee	12 months from date of despatch				
Health And Safety Information	Material Safety Datasheet documentation #20487 available at: https://www.bio-rad-antibodies.com/SDS/MCA929PE 20487				
Regulatory	For research purposes only
