| Specificity | <p>Mouse anti Human TdT antibody panel, clones HT-1, HT-4, Ht-8 and HT-9 is a mixture of 4 monoclonal antibodies specific for human terminal deoxynucleotidyl transferase (TdT). TdT is a DNA polymerase responsible for the catalysis of non-reversible addition of deoxynucleotides to the 3' end hydroxy groups of DNA. TdT levels are enhanced in all forms of acute lymphoblastic leukaemia (ALL) and in a significant number of chronic lymphoblastic leukaemia cases (CML). TdT is not expressed in the majority of myeloid leukaemias, non-Hodgkins lymphomas or mature lymphoid leukaemias.</p> |
| Flow Cytometry | Use 10ul of the suggested working dilution to label 1×10^6 cells in 100ul. |

| Storage | <p>Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. This product is photosensitive and should be protected from light. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p> |
