**Specificity** **Mouse anti Cytomegalovirus gH, clone 0861** is specific for Cytomegalovirus gH. Cytomegalovirus gH is an important determinant of virus infectivity. The subunit structure associates with the gL-gH-gO complex. The interaction with gL is necessary for the correct processing and cell surface expression of gH.

This antibody does not react with HSV, VZV, EBV or uninfected cells.

**Storage** This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
