

Datasheet: OBT0915 BATCH NUMBER 190814

Description:	RECOMBINANT HEPATITIS B SURFACE ANTIGEN AY		
Name:	HEPATITIS B SURFACE ANTIGEN AY		
Other names:	HBsAg		
Format:	Rec. Protein		
Product Type:	Recombinant Protein		
Quantity:	0.1 mg		

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	•			
Western Blotting	-			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

ecombinant Protein - liquid
nosphate buffered saline
one present
0 mg/ml

Product Information

Recombinant Hepatitis surface antigen preparation is a recombinant surface antigen, AY subtype of the Hepatitis B virus. It is produced using a *Saccharomyces cerevisiae*. expression system.

Four major serotypes of the hepatitis B virus are adentified according to variability of the surface antigen, defined by a common 'a' determinant and mutually exclusive determinant

pairs 'd/y' and 'w/r'. Hence, the subtypes are adw,adr, ayw and ayr. Further subdivision of these major subtypes has identified additional minor subtypes of the virus (Magnius & Norder 1995).

Protein Molecular Weight 24 kDa Purity ~95% by SDS PAGE ELISA OBT0915 may be used in a sandwich ELISA as a standard with 4940-1404 as a capture antibody and 4940-1484 as a detection antibody. References 1. Kee, G.S. et al. (2010) Exploiting the intracellular compartmentalization characteristics of the S. cerevisiae host cell for enhancing primary purification of lipid-envelope virus-like particles.
