<b>Specificity</b>	<b>Goat anti <i>Clostridium tetani</i> tetanus toxin antibody</b> recognizes the tetanus toxin of <i>Clostridium tetani</i> , an opportunistic pathogen commonly found in soil and the intestinal tracts of some animals. Tetanus toxin is a potent neurotoxin produced following the germination of <i>C. tetani</i> spores in wounds. It blocks neurotransmission by binding irreversibly to receptors in the brain and spinal cord.
<b>Storage</b>	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.  Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
<b>Guarantee</b>	12 months from date of despatch
