### Specificity

**Rabbit anti conjugated citrulline antibody** recognizes citrulline, an amino acid. Although citrulline is an amino acid, it is not incorporated into proteins during synthesis but is generated within proteins by the deimination of arginine. Citrulline occurs normally in many proteins, such as Myelin basic protein (MBP) while others, such as fibrin become citrullinated during inflammation or apoptosis.

Rabbit anti conjugated citrulline antibody (**OBT1300**) recognizes conjugated citrulline, but

not free citrulline.
