

Datasheet: OBT1670

Description:	MOUSE ANTI KINESIN HEAVY CHAIN
Specificity:	KINESIN HEAVY CHAIN
Other names:	KIF5B
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	H2
Isotype:	IgG2b
Quantity:	0.1 mg

Product Details

RRID AB_2132375

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen	▪			
Immunohistology - Paraffin	▪			
ELISA	▪			
Immunoprecipitation	▪			
Western Blotting	▪			1/500
Immunoblotting	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species Bovine

Species Cross Reactivity Based on sequence similarity, is expected to react with: Mammals, Chicken, Invertebrates
N.B. Antibody reactivity and working conditions may vary between species.

Product Form Purified IgG - liquid

Buffer Solution Phosphate buffered saline

Preservative Stabilisers 0.1% Sodium Azide (NaN₃)

Approx. Protein Concentrations IgG concentration 1.0 mg/ml

Immunogen	Bovine brain kinesin.
Specificity	<p>Mouse anti Kinesin Heavy Chain antibody, clone H2 recognises the heavy chain of kinesin toward the N-terminus. The epitope is located in the region of amino acids 420-445.</p> <p>Kinesins are microtubule associated motor proteins, responsible for converting nucleoside triphosphate released energy into mechanical energy. Kinesin-1 exists as a homodimer of 120-130 kDa chains, known as heavy chains. Associated with this dimer when purified from brain homogenates are light chains of 60-70 kDa. The light chains are involved in binding of kinesin to organelles and appear to have regulatory functions. They are not essential for motility generation.</p>
References	<ol style="list-style-type: none"> 1. Pfister, K.K. <i>et al.</i> (1989) Monoclonal antibodies to kinesin heavy and light chains stain vesicle-like structures, but not microtubules, in cultured cells. J Cell Biol. 108 (4): 1453-63. 2. Kamm, C. <i>et al.</i> (2004) The early onset dystonia protein torsinA interacts with kinesin light chain 1. J Biol Chem. 279 (19): 19882-92.
Storage	<p>Store at +4°C or at -20°C if preferred.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	12 months from date of despatch.
